

CASE STUDY: Animal Healthcare & Pet Plan

The Challenge:

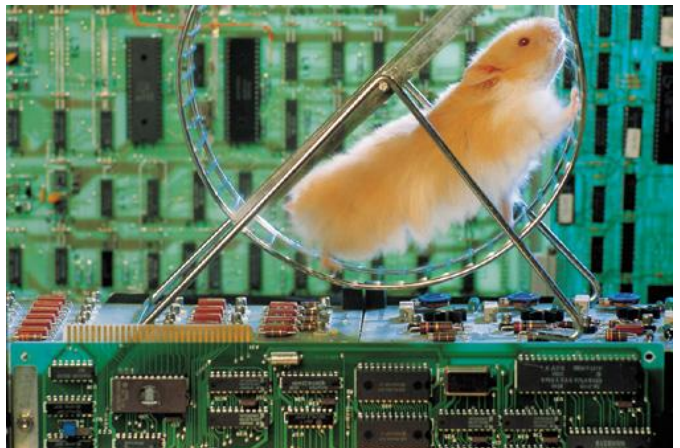

To develop a secure Website system to centrally administer payments and membership plans of hundreds of veterinary practices nationwide. Provide e-commerce tools for managing customer payments, financial reporting and issuing of invoices and letters. Provide veterinary surgeries with a system to administer their own customers and tools to produce reports and invoices.

How We Met the Challenge:

- System comprised of an admin site, two extranets (for the two main umbrella companies) and two websites for the public.
- System built using ASP.net and SQL server database.
- The sites provided secure logins and SSL to secure the system.
- Tools for financial reporting, business tools and process management all incorporated into sites.
- E-commerce tools provided for direct debit management and payments.
- Full testing of software and site. Automated testing using QTP.
- Hosted and maintained by Fujitsu and Cell Telecom.

Competencies deployed to this task:

- Project Management
- Requirement Management
- E-commerce
- QTP automated Testing
- Asp.net
- C#
- Visual Basic, Javascript,
- SQL Server

Web Development competence areas:

ASP.net, ASP, IIS, SQL Server, Access, php, MySQL, Linux, Apache, SSL, C#, Visual Basic, VBScript, Javascript, Jscript, AJAX, Java, MS Visual Studio, Dreamweaver, HTML, XHTML, XML/XSL, CSS, PERL, HP Mercury Quality Centre (MQC), QTP, Perforce, Messaging (SMS, MMS), Mapping and Location Based Services (Google, OS).
